## RETURN TO CIA LIBRARY

1. On 17 August 1950 the Peinsdorf (N. 52/E 78) airfield was occupied by 5 biplanes and 45 single-engine, low-wing monoplanes parked on the northern edge of the landing field. (1) The low-wing monoplanes were arranged in two opposite rows. The planes had a directional loop antenna on the fuselage behind the cockpit but no weapon projecting to the rear. They were painted dark green with the upper edge of the rudder assembly light blue. (2) There was no flying although the weather was fair.
2. There were no concrete runways, hangars, night or boundary lights at the field. Three cantonment buildings and a former farmhouse were in the northeastern corner of the landing field. Radar installations or AA gun emplacements were not seen on the landing field or its vicinity. (3)
3. A farmer who had some land near the airfield said that a revolving searchlight pointing upward could frequently be seen on the landing field.
4. Three trucks and two fuel trucks, each holding at least 25X1B 200 liters, were in the northeastern section of the landing field. Truck [redacted] on the field. (4)
